

Sustainable Product Guide

EarthChoice® products allow you to choose packaging options that best address your specific sustainability needs with every product providing at least one of these four benefits: Reduce, Reuse, Recycle, or Renew.

All of our Greenware® products are commercially compostable* and made of renewable materials. Compostable products help facilitate the diversion of food scraps from the landfill.

Recycleware® products are made with a minimum of 20-50% post-consumer recycled PET (RPET), for a reduced environmental impact. Products made from RPET use fewer virgin raw materials and help keep plastic out of landfills - supporting a circular economy.

* Commercially compostable only. Facilities may not exist in your area. Not suitable for home composting.

Reduce	Reuse	Recycle		Renew		
Made with less virgin resin	Top rack residential dishwasher safe	Made with recycled content	Recyclable*	Made of renewable materials	Commercially compostable**	BPI certified compostable
